DIGITAL AIRCRAFT TIMING INDICATOR

**NEW FOR
2025**

An advanced Digital Engine Timing Indicator designed specifically for aircraft maintenance. It uses cutting-edge MEMS digital inclinometer technology for precise firing angle setup.

- Accurate to $\pm 0.2^\circ$ ($\pm 0.2^\circ$ repeatability).
- Automatically locates top-dead-center (TDC) with digital precision.
- Self-calibrates to the aircraft's current orientation—no need to level the airframe.
- Remains on and retains settings until manually shut off—ideal for extended maintenance.
- Simply attach the cone to the spinner, insert the stop-plug, drop in the digital module, press the button and follow the prompt.
